

Environmental services

DESCRIPTION

Consultancy on the identification of projects of municipal interest related to factors that exert environmental pressure, mainly those derived from treated wastewater, storm water, landscape restoration, air emissions, waste reduction and recovery of WWTP sludge.

OBJECTIVES

Knowledge of the overall environmental impacts of the activities (municipal, industrial, etc.) and the study of alternatives for the minimization of impacts through R&D projects, rural development, ERDF, etc.

RESULTS / BENEFITS

Minimize environmental impacts.

ACTIONS

- Initial study includes:
 1. Inventory of environmental impacts.
 2. Diagnosis of environmental impacts.
 3. Analysis of minimization of environmental impacts.
 4. Report containing conclusions and alternatives for the reduction of environmental impacts.
- Economic feasibility analysis of the impact reduction alternatives studied through grants.
- Processing of and application for grants.
- Development of environmental impact reduction programme.

TARGET

Public administrations, public companies and municipalities with competencies over the service.
