

Self-monitoring of WWTP effluent in accordance with the discharge authorizations

DESCRIPTION

Discharge authorizations granted by water basin organizations entail the obligation to conduct periodic self-monitoring of the WWTP effluent plant and to submit the results to the organization in question.

Both the sampling and the analyses must be effected by a Collaborating Entity of the Water Administration (EMCA).

ACTIONS

- Sampling at the WWTP effluent control point.
- Analysis of the parameters indicated in the discharge authorizations.

OBJECTIVES

Comply with RD 1/2001, revised text of the Water Act.

RESULTS / BENEFITS

- Comply with current legislation.
- Reduced costs for possible administrative sanctions.

TARGET

Public administrations, public companies and municipalities with competencies over the service.
